Module 6.2: Password checks

Using the terminal or parrot OS:

PW check: works on newer versions of homebrew and pi

- brew install cracklib (if not already installed)
- cracklib-check <enter password to check>
- try with several passwords
- optional format: *echo* "*password123*" | *cracklib-check*

password generator:

- *pwgen -sy 16 5*
- generates 5 strong random 16-character passwords with symbols
- generate a few passwords with this

install apg: auto pw generator

- *brew tap jzaleski/homebrew-jzaleski*
- *brew install apg*
- generate a few passwords with this

try it out:

- *apg -m 12 -x 16 -n 5*
- 5 passwords between 12 and 16 characters.

Try each of these with cracklib-check at least three times
