Lab 08c: sky: my home, my stars

This is a group project!

We will work in teams based loosely on language and home country

Goal: To create a huge, beautiful map of the stars in this month at sunset, at your home, in your language

Specific notes:

Team Brasil: include the southern cross, and the names in Portuguese for each of the major constellations and sunrise-sunset times for 10.21.25 at your home

Team Germany (BRD-DUK): include the angle for Polaris at each of the team homes, and the constellation names in German and sunrise-sunset times for 10.21.25

Team Spain-Italy: include the names of stars and constellations named by the Moors, who lived in Spain, along with constellation names in Español and Italiano, and sunrise-sunset times for 10.21.25 at each location

Team Hawaii: do the same for Hawaiian names, with N, S, E, W labeled in Hawaiian for navigation, and major stars labeled in Hawaiian (e.g. Hokule'a), and sunrise-sunset times for 10.21.25 in Waimea

Team US: do the same for a location in the US (not Hawaii) including the angle for Polaris on your map, and local sunset time and the major constellations, and sunrise-sunset times for 10.21.25 at your location
