Lab 16d: earth: island chain biomes

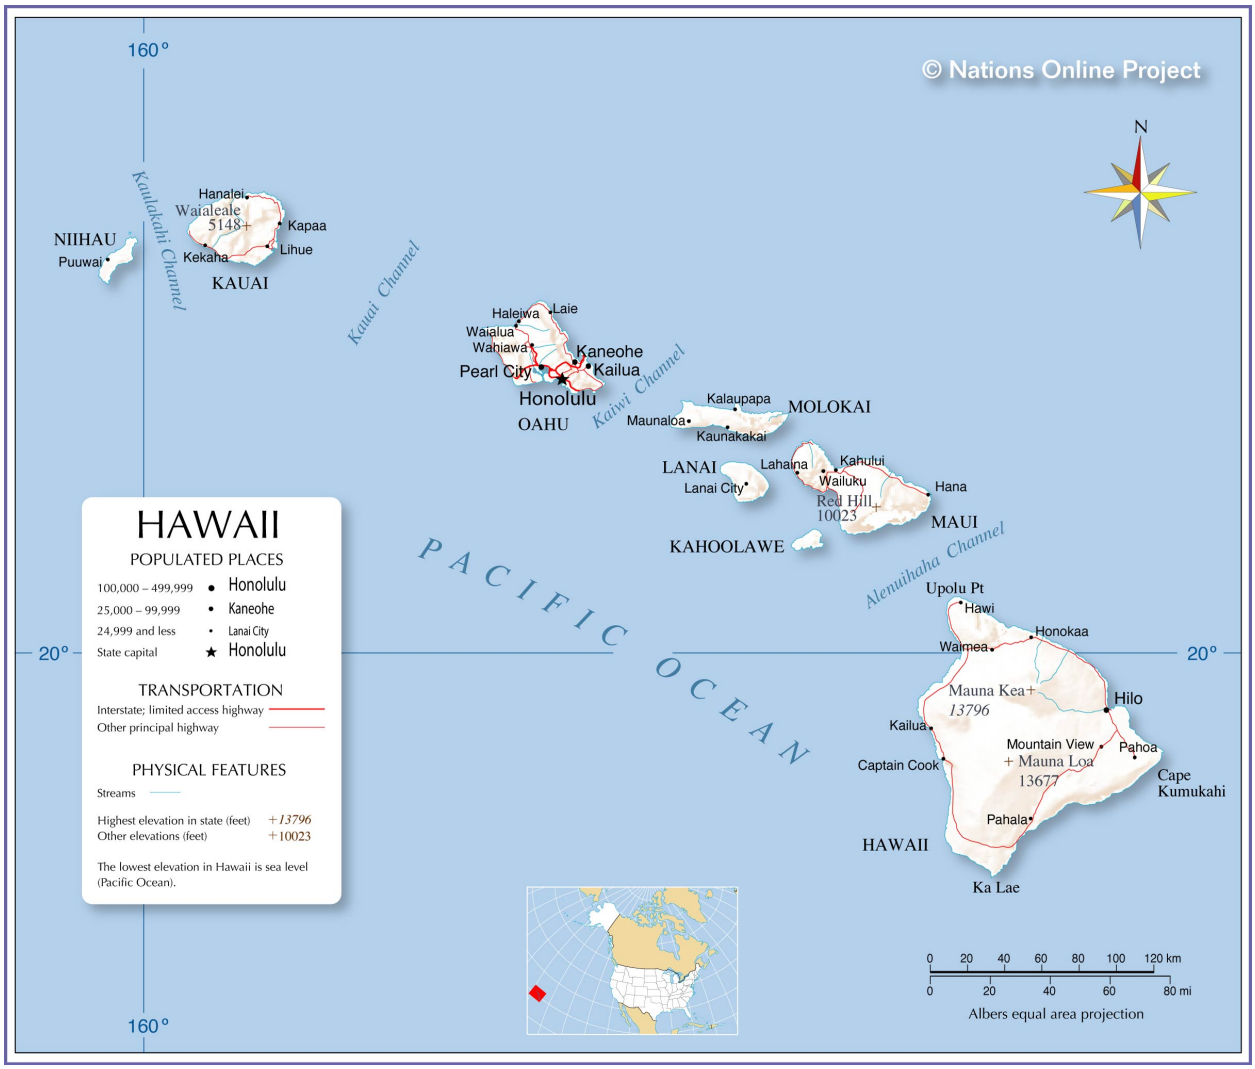

Below are two maps:

- Map of the state of Hawaii, from Niihau to our island
- Map of the entire island chain, including the wildlife preserve in the Northwest Hawaiian islands, known as papahanaumokuakea: "a sacred area from which all live springs" in Hawaiian legend
- Please read this before you make that map:

  https://www.papahanaumokuakea.gov/about/name.html

Your challenge is to make two large wall maps and find the biomes on each map
Some things you need to include in your maps:

1. a legend of the biomes
2. wind direction
3. ocean currents
4. annual precipitation at each biome
5. highest point on each island
